

PLOUGH MIXERS

The Plough Mixer ranges in size from 500 to 5,000 litres/batch mix and has the ability to mix a variety of products.

Raw material can be loaded manually (25 kg bags) through a vibrating sieve or using a Jacmor Bulker Bag (1,000 kg) Unloading System.

There is a choice of stainless steel grades for the Plough assembly.

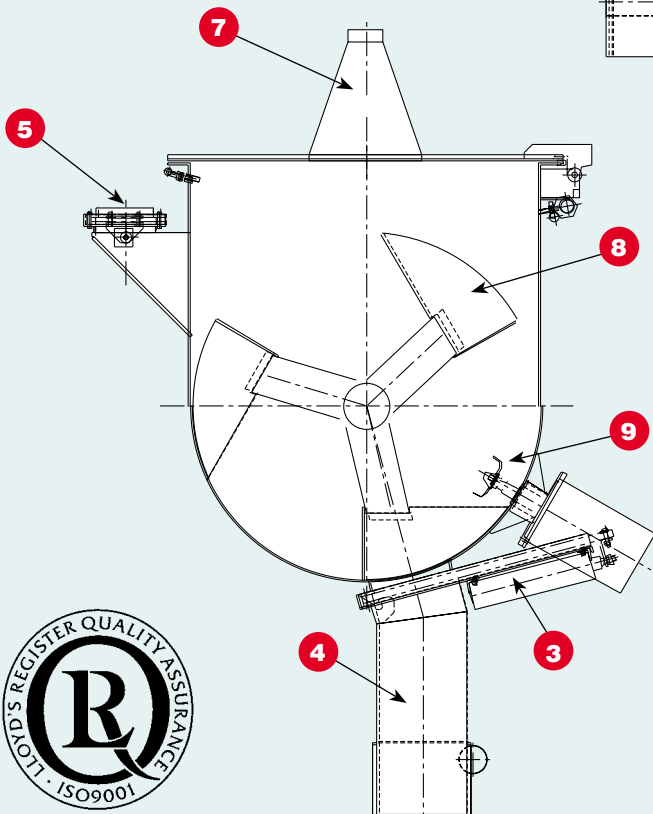

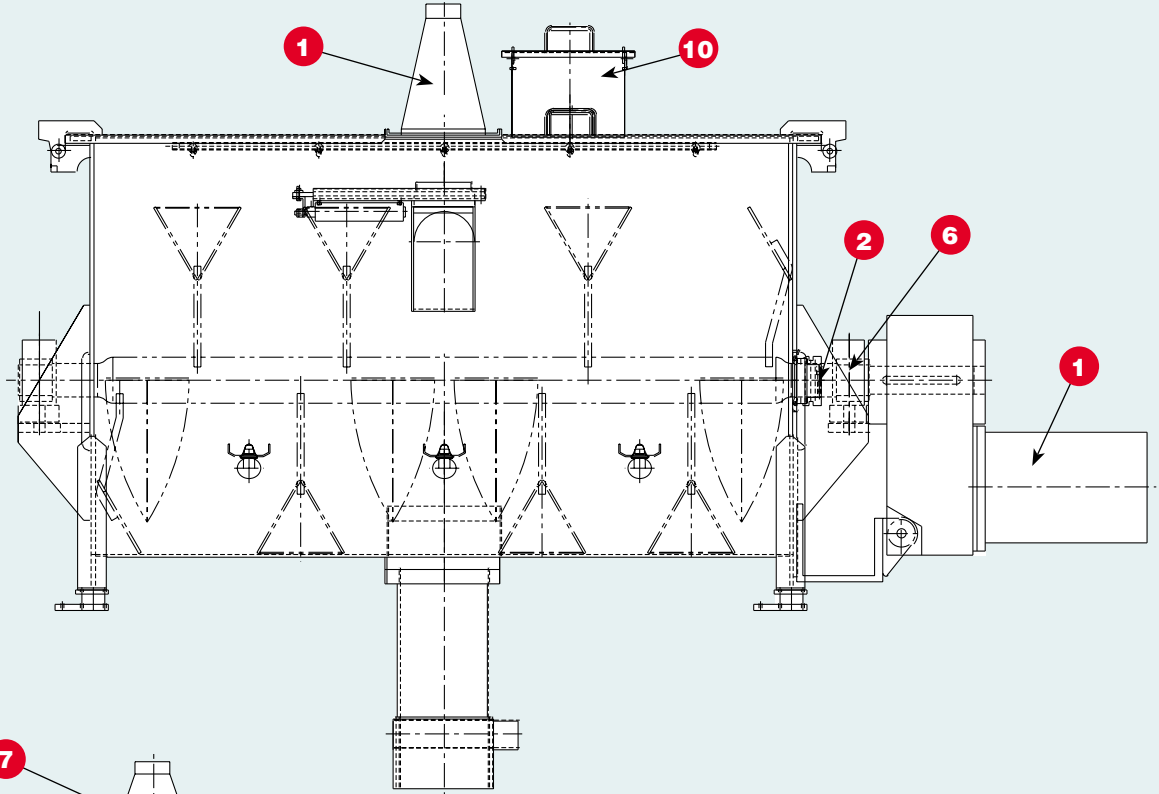

The mixer can be cleaned and sanitised to the Australian Standards for food processing.

Risk & Hazard Assessments, along with a Safety Category Rating are assessed during the early design phase to incorporate suitable safety features for the particular application.

These Risk & Hazard Assessments continue until the final commissioning.

PLOUGH MIXERS

Item	Description
1	Drive Unit
2	Air Purged Seal
3	Slide Gate
4	Outlet
5	Inlet
6	Plummer Block End Bearing
7	Dust Collector Shute
8	Mixing Ploughs
9	High Speed Wizzer Blades
10	Inspection Chute
